

# Anti Corrosive S.S Wire Detectable Warning Tape

“**GOLDEN**” Brand Anti-Corrosive S.S wire Detectable Warning Tape is a coloured plastic detectable tape for detecting buried underground services. S.S Wire detectable tape is manufactured using one or more stainless steel wires incorporated in sinusoidal pattern and encapsulated between two layers of low density lead free polyethylene film.

Anti-Corrosive S.S Wire Detectable Warning Tape can be easily traced with the help of standard cable locator even after many years of service been laid underground.

## Product Feature

- Specially manufactured to customers requirements.
- Stainless Steel Wire 0.5 - 0.7 mm.
- High Tensile strength.
- Totally encapsulated S.S wire between two layers of low density lead free polyethylene film to prevent corrosion.
- S.S Wire is incorporated in sinusoidal pattern.

## Advantage:

- Available in customized text.
- Available in various colours.
- Width from 50 mm to 600mm.
- Thickness from 100 to 500 micron.
- Easy traceable by the help of cable locator.

## Size:

Width in mm	Thickness in Micron	Roll length in MTRS
50	100	500
50	150	500
100	100	500
100	150	250
200	100	250
200	150	250
300	150	250
300	200	250
300	500	250
